

Enterprise E-Soft

e Soft View

A training Platform

White Paper

Version #1.0

About Enterprise e-Soft:

Enterprise-e-Soft is one of the leading IT firms based at Bangalore. The company was incorporated in the year 1999 with a vision to provide effective IT services & solutions to corporate houses.

Our core competences include Software solutions, IT Enabled Services, Technology training and Human Resource consulting.

Our competent management team, committed human resources, institutionalized systems & processes, coupled with excellent channel partners have helped us carve a niche for ourselves as a leading IT solution & service provider.

To serve our customers with competence, character & commitment form our core value system & we believe that these values give us the necessary conviction to sustain & excel in business.

Esoft View – A training platform: A Business Overview

With our vast experience in e-Learning and corporate training, we have now arrived with a new platform called “**Esoft View**”, adding a new dimension to training and e-Learning. **Esoft View** complements and reinforces the existing Classroom training and e-Learning. Having close to a decade of experience in training & learning services we strongly feel that the classroom training can never be eliminated. However we know that there is definitely a scope to compliment such training programs in multiple ways. Our efforts in this direction have given us the strong conviction backed with the relevant knowledge for developing such platforms for bettering the learning experience. This platform along with the content presented in the multimedia format tries to take the learning as close to a classroom session as possible. **Esoft View** is a self-paced learning platform providing infrastructure to the corporate or individual, for maximization of their training expenditure.

Features:

1. A multimedia experience of learning
2. Capability to navigate through the chapters at any instance
3. Content Encryption for better security
4. One time web based registration for tool and content
5. Light weight application

Advantages:

1. Better mileage for the training expenditure
2. Self paced learning
3. Infrastructure optimization
4. Logistics problems reduced
5. Time saving
6. Customized content creation
